PROFESSIONAL SUMMARY

Backend Developer specializing in .NET, with hands-on experience designing and shipping REST APIs and full backend systems using C#, ASP.NET Core, EF Core, and SQL Server. Builds with Clean Architecture (Repository, Unit of Work, Specification patterns) and delivers reliable, maintainable solutions from planning through deployment.

SKILLS

- Languages & Frameworks: C#, ASP.NET Core, EF Core, LINQ, .NET, Java, Spring Boot, Python (Flask)
- Architecture & Patterns: Clean Architecture, Repository, Unit of Work, Specification Pattern, REST API design
- Data & Infrastructure: SQL Server, Redis, Git, Postman
- Core Competencies: OOP, Data Structures & Algorithms, Agile, Problem Solving
- Web Fundamentals: HTML, CSS, JavaScript
- AI-Assisted Development: Leveraging AI tools (e.g., Claude, GitHub Copilot) to accelerate delivery and improve code quality

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer — RELIQ Productions (Remote)

Jul 2026 – Aug 2026

- Designed and built the full e-commerce website for RELIQ Productions, a local fashion brand, from the ground up — now live at [reliqproductions.com](#).
- Architected a .NET ASP.NET Core Web API backend with a layered Clean Architecture (Shared/Core/Infrastructure/API) alongside an HTML/CSS/JavaScript storefront.
- Implemented product catalog with variant/stock management, cart, checkout (Cash on Delivery and InstaPay), JWT authentication with Admin/Customer roles, and an admin dashboard.
- Used AI-assisted development tools throughout the build to speed up delivery while keeping the codebase clean and well-structured.

Backend Developer — OffshorUp (Remote, USA)

Nov 2024 – Jan 2025

- Developed a landing website and CRM system for a US-based client in a fully remote engagement, coordinating requirements and delivery across time zones.
- Resolved a scope conflict over overlapping code edits by proposing a clear division of responsibilities, keeping the project on schedule.

PROJECTS

QualiCode — Code Style & Complexity Checker (Graduation Project)

- Built the machine learning model and Flask backend for a web-based tool that analyzes code style and time complexity.
- Parsed source code into an Abstract Syntax Tree (AST) to analyze structure and extract patterns for style and complexity checks.
- Implemented detection for naming convention violations (camelCase vs. snake_case) and leftover debug statements.

Commerca — E-Commerce Platform

- Designed and built a full-featured e-commerce platform in .NET covering product management, order processing, payments, and an admin dashboard.
- Applied Clean Architecture (Repository, Unit of Work, and Specification patterns) to keep the codebase modular, testable, and easy to extend.
- Customized and deployed the platform for multiple clients, owning the full lifecycle from development through delivery and ongoing maintenance.

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Computer Science — Misr International University

2020 – 2024

- Faculty of Computer Science — GPA: 3.1

Backend Web Development (.NET) — Route Learning

2025 – 2026

- Comprehensive program covering C#, ASP.NET Core, EF Core, SQL Server, and API development.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Project Manager — MUN & Arab League

2023 – 2024

- Led project planning and team coordination for club initiatives and charity events, aligning cross-functional members around shared deadlines.

IT Member — MUN & Arab League

2022 – 2023

- Built internal portals for attendance tracking, complaint management, and HR interviews using PHP, HTML, CSS, JavaScript, and AJAX.
